About ISHNA

ISHNA is a multi-service organisation based in Ajmer, Rajasthan, delivering integrated solutions in Construction Consultancy, Solar Energy, and Maintenance Services. We proudly serve homeowners, builders, architects, and businesses across Ajmer district and adjoining cities with reliable, professional expertise.

At ISHNA, we believe in building long-term relationships through trust, transparency, and consistent quality — delivering cost-effective, durable, and future-ready solutions that add real value to your investment.

Led by **Vivek Tharaney** — with strong technical qualifications, Project Management certifications, and experience across banking, education, construction, logistics, trading, and multinational environments — ISHNA's multidisciplinary expertise drives our commitment to quality and customer satisfaction.

Construction Consultancy

We provide complete support including planning, budgeting, material selection, vendor coordination, and timely project execution — whether on a job-work basis or a full works contract including materials. Our structured, transparent approach ensures quality outcomes within defined timelines and budgets.

CLEAN. EFFICIENT. COST-EFFECTIVE.

Solar Services»

Our Solar Rooftop Solutions are designed to significantly reduce electricity bills while promoting clean, sustainable energy. We use high-quality components from reputed brands to ensure long-lasting performance, low maintenance, and maximum efficiency, tailored to Rajasthan's climatic conditions

Inverter & Electrical Setup

//

The solar yojna (govt. scheme) is catering to everyone, from poor to middle class as well, so I asked Mr. Vivek (the company owner) to install the plant for me as well. I am very satisfied with the quality of his work, and the solar panels. It's quite nice that at month end I don't have to pay for electricity, and I believe that everyone with a roof should get solar panels installed.

-Rooftop Solar Customer, Ajmer
